NIKOLAS MARTELARO

10 Comstock Cir. Apt 102
Stanford CA, 94305
nikmart@stanford.edu
www.nikmartelaro.com

I explore the future of design. My research focuses on creating interaction systems and design tools with the goal of helping designers better understand people. I blend a background in mechanical engineering, mechatronics, computing, and product design to explore how designers and users can interact through physical product. My work looks at people using intelligent systems and has implications for human-robot interaction, autonomous cars, and everyday interactive devices. My teaching aims to provide designers the skills to use new technologies and develop systems that focus on the needs of people.

EDUCATION

2012 - 2018 **Stanford University**, Stanford CA
Ph.D. in Design, Mechanical Engineering (Expected June 2018)
DISSERTATION: *The Needfinding Machine*
COMMITTEE: Larry Leifer, Wendy Ju, Pamela Hinds, James Landay

2012 - 2014 **Stanford University, Stanford, CA**
M.S. Mechanical Engineering

2008 - 2012 **Franklin W. Olin College of Engineering**, Needham, MA
B.S. Engineering: Design

RESEARCH EXPERIENCE

2016 - PRESENT MACHINE LEARNING DATASET CREATION FOR DRIVER FOCUSED INTELLIGENT ASSISTANTS
Stanford University, Research Assistant — PI: Wendy Ju
Sponsor: Toyota Research Institute

Creating an open dataset for supervised machine learning around when it is appropriate for in-car speech agents to proactively talk to a driver. Developed a protocol for asking drivers "Is now a good time?" while on a 40-minute naturalistic driving route. Developed an in-car data collection system with five video channels, GPS, inertial measurement, physiological measurement, and automotive computer (CAN) data. Mentored an undergraduate researcher to help run study participants.

SUMMER 2017 PRODUCTIVITY IN THE CAR
Microsoft Research, Research Intern — PI: Shamsi Iqbal

Exploration of speech-based productivity applications for use in the car. Designed and ran a simulator based driving study looking into how task support and road context alerts could help drivers create documents using speech while also maintaining safety on the road. Conducted statistical analysis of driving performance and qualitative video interaction analysis.

2014 - present

Needfinding Machines: Tools for Remote Needfinding through Physical Products

Stanford University, Research Assistant — PIs: Larry Leifer & Wendy Ju

Exploration of interactive devices as conversational infrastructures between designers and their users. Development of a remote control prototyping system for use in cars and homes. Collaborations with practicing designers at Renault, Spotify, and Volkswagen to explore how the system and method influences their design practice and understanding of their users in real-world contexts.

2015 - 2016

Interactive Device Design Tools

Stanford University, Research Assistant — PIs: Wendy Ju & Mark Horowitz

Evaluated numerous connected device prototyping platforms and developed a standardized toolkit for creating internet connected physical hardware. Developed and co-taught a workshop aimed at designers and conducted qualitative research on how they used the toolkit within their own projects.

2014 - 2015

Assistive Robots for Students Learning Electronics

Stanford University, Research Assistant — PIs: Pamela Hinds & Wendy Ju

Designed an interactive robot to teach students electronics and explore how robot interactivity and vulnerability would influence trust, disclosure, and companionship with the robot. Co-designed a lab study and mentored a student researcher in running experiments. Mentored an undergraduate student to run experiment sessions. Participated in the National Science Foundation Expedition on Socially Assistive Robotics.

2013 - 2014

Human-Robot Interaction with Teams Under Stress

Stanford University, Research Assistant — PIs: Pamela Hinds & Malte Jung

Co-developed a human-robot interaction study exploring how a robot can facilitate better team cooperation during stressful situation using social repair strategies. Conducted a lab-based study and trained a confederate to perform a difficult teammate.

2012 - 2013

Tutor Robots for Children Learning Electronics

Stanford University, Research Assistant — PIs: Malte Jung & Clifford Nass

Designed and developed an interactive robot to teach students electronics. Ran a Wizard-of-Oz study to explore how interest from the robot and whether the robot was the electronic prototyping kit itself or a separate robot would influence student learning.

2008 - 2012

Distributed Design Sketching

Franklin W. Olin College of Engineering, Research Assistant — PI: Ozgur Eris

Designed and developed an distributed whiteboard system to explore how two designers sketch together at a distance. Ran a user study with and used video interaction analysis to code sketching behavior during design sessions.

TEACHING EXPERIENCE

2016 - PRESENT

Workshop Instructor
INTERACTION ENGINE, Stanford
With Wendy Ju and Michael Shiloh.

Developed an introductory workshop to teach designers how to prototype interactive and connected devices using open source hardware and software. Developed a toolkit based on Raspberry Pi, Arduino, and NodeJS introducing students to physical computing, networking, and interactive device design. Created open source learning materials and taught workshop at the TEI conference, Stanford, and California College of the Arts.

SUMMER 2015

Teaching Assistant
EE 47, INTRODUCTION TO INTERACTIVE DEVICE DESIGN, Stanford Electrical Engineering
With David Sirkin.

Worked as head teaching assistant and interacted with students primarily during lab sessions. Developed and taught an introduction to programming for students with limited programming experience. Provided circuit and code debugging during labs and the final project. Coached students on the design and implementation of their final interactive device projects.

WINTER 2015

Teaching Assistant
MS&E 488, PROTOTYPING AND RAPID EXPERIMENTS, Stanford d.school
With Pamela Hinds and Julie Stanford.

Coached students on the design of prototypes and rapid experiments during industry sponsored projects. Provided organizational assistance to the course instructors. Developed and taught a lecture on physical and digital prototyping methods. Provided design critique of intermediate and final design deliverables.

SPRING 2012

Teaching Assistant
ENGR 2205, USER-ORIENTED COLLABORATIVE DESIGN, Olin College
With Ben Linder and Lawrence Neeley.

Coached student design teams on user-centered design methods including contextual inquiry, benchmarking, ideation, iterative design, and concept prototyping. Provided organizational assistance to the teaching team. Provided design critique on intermediate and final design deliverables.

INDUSTRY EXPERIENCE

SUMMER 2017

Microsoft Research, Redmond, WA
Research Intern
MENTOR: SHAMSI IQBAL

SUMMER 2011 & 2012

MITRE Corp., Bedford, MA
Research Intern
MENTORS: DOUG PHAIR, TINA CROTTY, LES HOLTZBLATT

HONORS AND AWARDS

Best Demonstration, CSCW'17. Portland, OR. *With Wendy Ju.*

National Science Foundation - Graduate Research Fellowship Program (NSF GRFP). Awarded 2013.

Miller Research Fellowship, Franklin W. Olin College of Engineering. Awarded Summer 2009.
